

## Secondaries Market Trends

Secondaries have been one of the fastest growing segments of the private equity asset class in recent years. Transaction volume has exceeded over \$100 billion for the past four consecutive years and 2025 was a record year with volume reaching \$226 billion<sup>1</sup>, a 41% increase from 2024.

### The market for secondaries is robust

As it has expanded, the secondaries market has come to be viewed as a crucial source of liquidity, integral to the smooth functioning of the private equity market. For secondaries investors, the market opportunity is a function of flows into private equity and the rate of turnover of those interests.

Approximately \$14 trillion<sup>2</sup> of capital has flowed into private equity over the last decade. As of year-end 2024, assets under management stood at nearly \$12 trillion (chart). These assets are the source of potential secondary transactions in the future. Some estimates suggest secondary deal volume could reach \$400 billion in a few years.<sup>2</sup>

Turnover refers to the rate at which private equity interests are bought and sold on the secondary market (chart). Higher turnover rates indicates a more active secondary market. Secondaries, once a niche exit strategy, have evolved as a standard exit path for investors needing liquidity in an illiquid asset class. As a result, turnover has accelerated in recent years, and we believe it will remain brisk into the foreseeable future.

### Private equity flows drive secondaries growth

Private Equity AUM & Secondary Market Deal Flow (\$B)<sup>3</sup>

### Turnover: When buyers become sellers

#### PRIVATE EQUITY INVESTMENT

An investor makes a commitment to invest in a private equity fund

#### INVESTOR NEEDS LIQUIDITY

*Before the fund matures, the investor needs to sell their interest in the fund*

#### SECONDARY TRANSACTION

A secondaries fund buys the investor's stake

#### Why private equity investors sell their interests

- ✓ Need cash for new funds
- ✓ Need cash for capital calls when distributions are slow
- ✓ Rebalance when private equity weights exceed targets
- ✓ Personal liquidity needs

Unless otherwise noted, all statements herein reflect the opinion of Pomona and its view of the financial markets, and the secondary private equity market in particular. This material is provided for informational purposes only and reflects the views and opinions of Pomona. Prospective investors should consult their financial, tax and legal advisors prior to making a commitment to private equity or any Pomona-sponsored fund. Investments in private equity involve a substantial degree of risk; there is no guarantee that an investment in a Pomona-sponsored fund will ultimately be profitable and an investor could lose some or all of their investment. Past performance is not indicative of future results. See important disclaimers and footnotes at the end of the presentation.

### Secondaries: An established asset class

The private equity secondaries market has evolved into a resilient asset class in large part because of the diversity of sellers participating in it. A broad mix of investors—including pensions, financial institutions, investment companies, sovereign wealth funds, high-net worth individuals and endowments—sell their private equity stakes in the secondary market when they need to rebalance allocations or manage their liquidity.

A market with diverse seller types contributes to stability by providing more predictable and consistent deal flow, liquidity and price discovery. Over the past 20 years, secondaries have outperformed public equities (chart). Together, these demonstrate the depth and strength of the secondaries market.

### About Pomona Capital

Founded in 1994, Pomona Capital is a global private equity firm that has \$20 billion<sup>6</sup> in capital commitments across its sponsored funds and separate accounts.

Pomona manages a series of secondary and primary strategies for a global group of over 350 sophisticated investors. Pomona fields a team of experienced professionals with local networks, country expertise and GP relationships across both mature and developing markets. The team has an established record of originating, analyzing, negotiating and closing diverse transaction types.

Over our 30-year history, we have analyzed \$1T+ in secondary transactions and purchased ~750 funds, totaling investments in 10,000+ companies. Pomona has a demonstrated track record of delivering strong returns and liquidity with a low risk profile<sup>7</sup> over multiple economic cycles.

Past performance is not indicative of future results. See important disclaimers and footnotes at the end of the presentation.

#### Footnotes & Disclaimers

- i. The Cambridge Secondary Funds Index is based on unaudited quarterly performance data compiled from 369 secondary funds (excluding hard assets funds), including fully liquidated partnerships, formed between 1991 and 2024. The index has limitations (some of which are typical to other widely used indices) and cannot be used to predict performance of the Fund. These limitations include:
  - Survivorship bias (the returns of the index may not be representative of all secondary funds in the universe because of the tendency of lower performing funds to not report returns to the index);
  - Lack of transparency (the specific funds that are included in this index are not disclosed by Cambridge Associates, and therefore cannot be independently verified);
  - Heterogeneity (not all secondary funds are alike or comparable to one another, and the index may not accurately reflect the performance of a described style); and
  - Limited data (many funds do not report to indices, and the index may omit funds, the inclusion of which might significantly affect the performance shown).
- ii. MSCI World Index: The “MSCI World Index” is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed markets. The MSCI World Index consists of the following 23 developed market country indexes: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, the United Kingdom, and the United States. (<https://www.msci.com/world>) while Pomona focuses on primarily purchasing secondary interests in private equity funds. The MSCI World Index has not been selected to represent an appropriate benchmark to compare an investor’s performance, but rather is shown as a comparison to that of a well-known and widely recognized index. The MSCI World Index is not subject to any of the fees and expenses to which any Pomona fund would be subject and no fund sponsored by Pomona Capital will attempt to replicate the performance of the MSCI World Index.

**Private equity investments are subject to various risks.** These risks are generally related to: (i) the ability of the manager to select and manage successful investment opportunities; (ii) the quality of the management of each company in which a private equity fund invests; (iii) the ability of a private equity fund to liquidate its investments; and (iv) general economic conditions. Private equity funds that focus on buyouts have generally been dependent on the availability of debt or equity financing to fund the acquisitions of their investments. Depending on market conditions, however, the availability of such financing may be reduced dramatically, limiting the ability of such private equity funds to obtain the required financing or reducing their expected rate of return. Securities of private equity funds, as well as the portfolio companies these funds invest in, tend to be more illiquid, and highly speculative.
